About Me

Strong in design and integration with intuitive problem-solving skills. Passionate about implementing and launching new projects. Ability to translate business requirements into technical solutions. Looking to start the career as an entry-level software engineer with a reputed firm driven by technology.

Projects

Borrow Mart (Online Shopping):

This project is an attempt to provide the advantages of online shopping to customers by renting their outfits . Thus the customer will get the service of online shopping and home delivery. This system can be implemented to any shop in the locality or to multinational branded shops having retail outlet chains

Vision based algorithm for sensing of railway track:

- The project is to provides the multi sensor railway track geometry surveying system.
- Railway Bridge damage status is monitored by the sensor and transfer through wireless modules.
- For easy surveying and with less delay the information can be send to the authority.
- To avoid accident and to safeguard the people.

Awards

- Active memeber of Hospitality committee.
- Active member of Computer Graphic committee.
- Awarded in TechJam.
